

THE PLUS OF THE SHIPYARDS

The varnishing room (Su Arrasolu) can hold boats up to 35 meters long and according to current rules and regulations, it is way below the limits allowed percentage of harmful emissions. Humidity and temperature are accurately measured by the burners with a thermal power of 230kW assisted by four industrial vacuums and by the electric cargo door. Here, complete varnishing with various materials (overall gelcoat and Awlgrip), plastering (fibreglass and wood), finishing of internal surfaces are carried out.

The Cala Saccaia (Olbia) shipyard is set for garaging of and assistance to yachts of up to 44 feet. In the 5,000 square meters building on three levels there is a mechanical workshop, an electric workshop, and structural work, woodwork, and varnishing rooms, also a storage room for parts and accessories, while in the yard (same size), there is the electric crane for haulage and launching boats of up to 40 tons. At Cala Saccaia is the show room, with 3,000 square meters of exhibition area which offers clients the possibility to visit boats without having to pass through the shipyard, in a comfortable space which recalls the port shoulder: an evolution of yacht purchasing, oriented to customers and their needs, if one considers also the 1,500 square meters dedicated to the customization of new boats.

Il cantiere è dotato di **SALA VERNICIATURA** per scafi fino a 35 metri, di carpenteria metallica, **FALEGNAMERIA** e tappezzeria.

The shipyard is equipped with a varnishing room for hulls of up to 35 metres and a metal carpentry room, woodworking, and refurbishing of internal surfaces.

REFITTING DI BARCHE IN ACCIAIO, LEGNO E VETRORESINA
